May 2013

DEVELOP A CURE

THREAT LEVEL: BLACK

ASSIGNMENT #7

Now that we know the infectious sound sequence was picked up and is spreading by songbird mimicry, we need to find a cure.

DETAILS:

DASH⁵ is isolating a two-word component of a potential cure. We've begun drawing blood from several patients, and these "drawings" can be found in the grid enclosed. Each row and column contains exactly one matching pair of drawings, representing words that only differ by one or two letters. Record these pairs of words on the second page enclosed, listing the drawings within each row or column from left to right or top to bottom. Any drawings that go unused, and blood types that occur less frequently, will be used in obtaining your final answer.

RESULT: _____ SCORE: 30pts
