

Lapis Lazuli's Waterworks 2

This puzzle is based on one I made for Puzzled Pint in May 2021, as part of my Steven Universe set.

Place pipes to create a single closed water system. The entire perimeter is filled with water. The central connection nodes are labeled with letters that indicate the type of junction that occurs there.

- I = Two pipes connect to the node in opposite directions, making a straight line
- L = Two pipes connect to the node at a 90 degree angle, making an L shape
- T = Three pipes connect to the node, making a T intersection
- O = No pipes are connected to the node.
